

Global Content Distribution

ASTRA 4A (SIRIUS 4) at 4.8° East

The most powerful Ku band platform for Africa, covering the entire Sub Saharan region. A strategic connectivity between Europe and Africa allow us to bring your TV channel directly to viewers' homes all over Africa, using reception dishes as small as 90 cm.

ASTRA 4A (SIRIUS 4) Advantages

- Growing video neighborhood for TV channels with French, English and Portuguese language speaking audiences.
- Ku band full transponder Multi Channel Per Carrier (MCPC) platform with reception by small dishes of 90 cm – 1.2cm all over the Sub Saharan region.
- The most powerful coverage among all satellites operating today for African distribution with wide Ku Band beam covering 70% of the African continent
- Accessibility to African Cable Head ends and IPTV.

- Uplink from Europe to allow easy and cost effective access with no need for contribution satellites.
- Two African Direct To Home (DTH) bouquets are due to launch on ASTRA 4A (SIRIUS 4) soon
- Direct accesses to a continent with 1,128 billion inhabitants, millions of whom are foreigners from different countries.

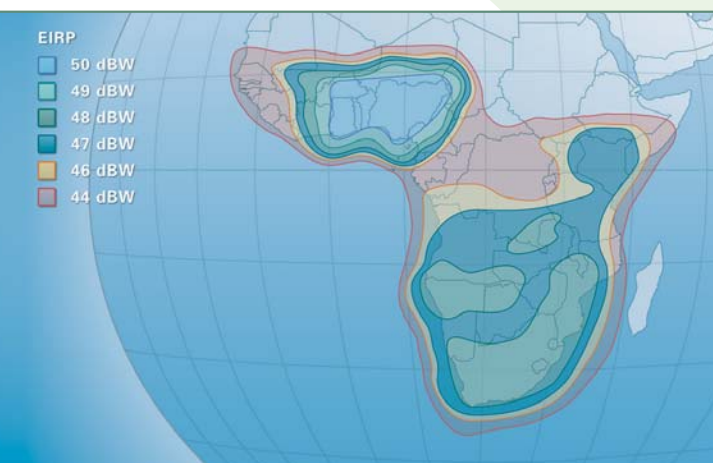

Satlink's ASTRA 4A (SIRIUS 4) Advantages

- Satlink's strategic location at the cross roads of Europe, Asia, the Middle East and Africa; our more than 80 earth stations, and Satlink's Global Fiber Network allow us to deliver your channel easily from anywhere in the world to your Africa based viewers.

Satlink - End to End solutions

- 24/7 technology advanced Play Out centers
