

SatLink To Be AMOS-5's Prime TT&C Engineering and Operations Station

Satellite's Operations and Management to be Handled from SatLink's Facilities

Jerusalem – August 28, 2011: SatLink Communications Ltd., a leading teleport delivering your content to every corner of the world, today announced it has been appointed by Spacecom, operator of the AMOS satellite fleet, as the prime provider of satellite engineering services including TT&C (Telemetry Tracking & Commanding) and IOT (In Orbit Testing), among others, for the AMOS-5 satellite. SatLink will dedicate 150m² from its facilities for AMOS-5's satellite management operations, including offices and the satellite's Master Control Room premises.

SatLink is one of few independent teleports to be entrusted by satellite owners and operators to perform mission critical control services for their satellites. The most popular satellite engineering services the company conducts are TT&C, IOT and CSM services, E.I.R.P. Measurements, Hosting GEO Location Services and Turnkey Projects. SatLink provides these services to SES World Skies, SES Astra, AsiaSat, AMOS and others. For instance, the company provides TT&C services for SES WorldSkies' NSS6 at 95°E and has lately conducted satellite drifting and TT&C services for Spacecom and other Asian based satellite operators.

"We are proud to closely collaborate with Spacecom for the AMOS-5's operations following its launch and forward over its lifetime as it operates over Africa and we look forward to offering our customers delivery to Africa over this satellite," remarked David Hochner, CEO of SatLink Communications. "SatLink's record of trustworthiness, experience and reliability over the last two decades has resulted in numerous satellite operators around the world putting their most valued assets, their satellites, in our hands."

AMOS-5 is scheduled to launch later this year to the 17°E orbital position from where it will deliver high-power C-band and Ku-band capacity to the entire African continent with connectivity to Europe and the Middle East.

###

About SatLink Communications Ltd. - SatLink delivers your content to every corner of the world. Recognized as a pioneer in global satellite communications services, SatLink is among the world's 15 top independent teleports and a leading provider of transmission solutions for Global Content Distribution over Satellite Platforms, Fiber and IP. SatLink's services include Uplink, Downlink and Turn Around in SD, HD & 3D, Playout facilities, Production, SNG & Fly Away, Hub Hosting, iDirect VNO Hosting, Video Monitoring, IPTV and TT&C. Strategically located in the heart of the Middle East, SatLink provides access to a worldwide network covering five continents and has been providing its clients with flexible and cost-effective transmission solutions for close to two decades. SatLink operates a range of premier MCPC platforms including HotBird, AsiaSat 5, Galaxy 19, Astra 4A/ Sirius 4, Eurobird 9, AMOS-5, Atlantic Bird 4, and more.
