

**CNN has chosen SatLink Communications to deliver news from Israel to the World**

**Jerusalem, Israel – November 10, 2008** – SatLink Communications Ltd., 2007’s fastest growing teleport according to The World Teleport Association, announced today that CNN (Cable News Network) has selected the company to provide its broadcast contribution needs in Israel and the Palestinian Authority.

CNN is using SatLink’s turnaround and uplink services for transmitting content from its bureaus in Israel and the Palestinian Authority to the NSS-7 satellite for reception at CNN U.S. headquarters. SatLink met the international broadcaster’s needs for reporting from this part of the Middle East by creating a fiber backbone between CNN’s local bureaus and its teleport facilities outside of Jerusalem from where the content is uplinked.

“SatLink is proud to be working with one of the world’s most noted broadcast brands, CNN”. noted David Hochner, CEO of SatLink Communications. He added, “As we approach the local election cycles, SatLink is well prepared to be the provider of technical broadcast services of choice for all networks and broadcasters in the region.”

###

**About Satlink Communications Ltd.-** SatLink is recognized as a pioneer in global satellite communications services.
